## Legal Translations for Law Firms

In the last census, the U.S. population speaks about 350 languages and the nation has over 67.3 million people who are bilingual<sup>1</sup>. That means that roughly 22 percent of U.S. residents speak a language other than English at home. The top languages with more than one speakers each are:

- **Spanish**
- **Chinese (Mandarin and Cantonese)**
- **Arabic**
- **Hindi**
- **Tagalog**
- **Telugu**
- **Vietnamese**

Even though we have a huge bilingual population, there is a large percentage that do not speak English at all. Is your firm ready to accommodate such growing demand? With the amount of direct interactions of attorneys with their non-English speaking clients, hiring a language services company is not a luxury but something that is crucial to a law practice.
